“Credit Bureaus Don't Have The 'Verifiable Proof' Required by the Law”

It's that simple ... the **“LAW”** requires them to only report items that they have verifiable proof for, yet the Credit Bureaus **DO NOT** comply with the law unless they are **FORCED** to do so. The “trick” is to force the bureaus to provide “verifiable proof” showing that they have a legal right to report any specific account item. To do this they **MUST** have a copy of the original documents used to set up the account and these documents **MUST** have a signature on it. The original creditor might have this information on file but the Credit Bureaus **NEVER** have the required proof.
